

CHECKLIST FOR DAILY ENHANCED CLEANING AND DISINFECTION

In alignment with infection prevention and control best practices, appropriate planning, training and actionable measures need to be undertaken to prevent the transmission and spread of COVID-19 in the workplace. Enhanced cleaning and disinfection procedures of high touch areas, surfaces and objects ensure that supervisors and staff understand their responsibilities and are compliant with the procedures at multiple points throughout their shift.

This document is to be used in conjunction with the chemical handling and safety table from the

'Checklist for Safe Storage of Environmental Cleaning Products' document.

Read all cleaning product labels before use.
